Ideation phase

Brainstorm & idea prioritization Template

| Date	07 November 2025
TeamID	NM2025TMID03188
Project Name	Lease Management

Prevent user deletion if assigned to an incident template:

In the Lease Management module, each incident template may have one or more users assigned to manage, resolve, or monitor lease-related incidents. To maintain system integrity and prevent data inconsistencies, it is essential to ensure that a user who is currently assigned to any active incident template cannot be deleted from the system.
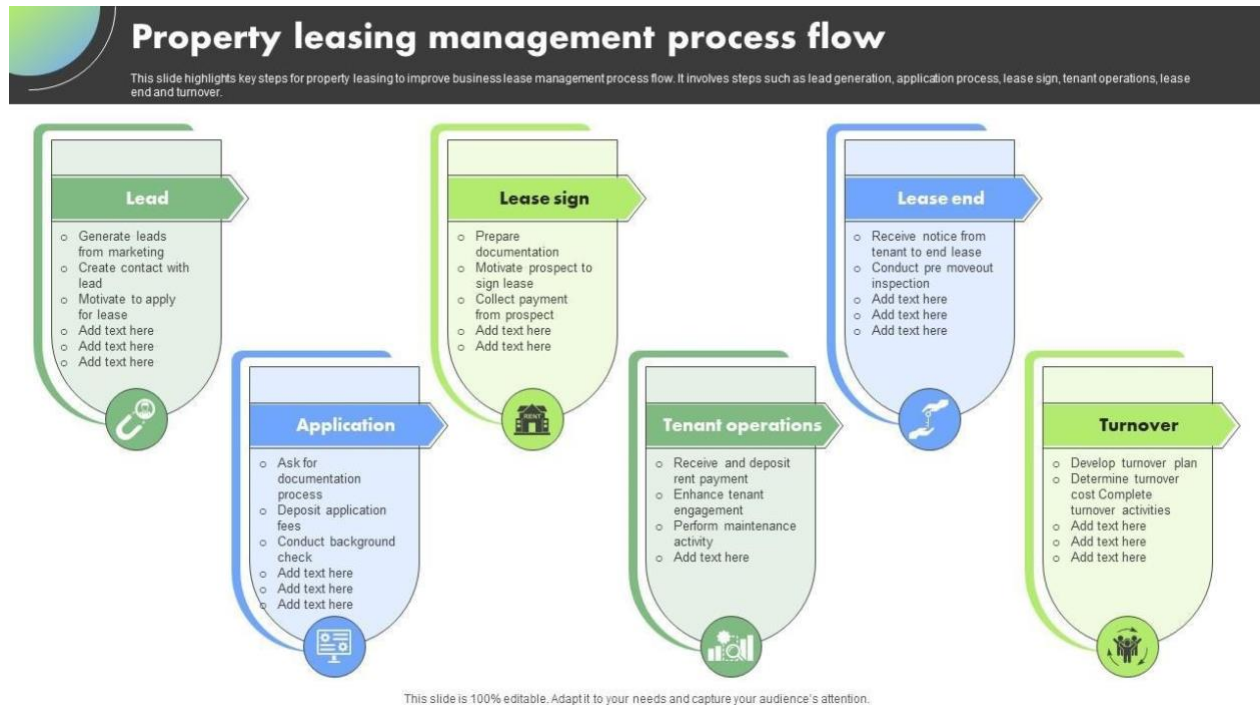

This feature enforces a safeguard mechanism where, before a user record is deleted, the system automatically checks if the user is linked to any incident templates. If such a relationship exists, the deletion process is blocked, and an appropriate error message is displayed.

step1:Team gathering,colloboration and the problem statement

step2:brainstrom,idea listing,and grouping:

Property leasing management process flow

This slide highlights key steps for property leasing to improve business lease management process flow. It involves steps such as lead generation, application process, lease sign, tenant operations, lease end and turnover.

Lead
- Generate leads from marketing
- Create contact with lead
- Motivate to apply for lease
- Add text here
- Add text here
- Add text here

Application
- Ask for documentation process
- Deposit application fees
- Conduct background check
- Add text here
- Add text here
- Add text here

Lease sign
- Prepare documentation
- Motivate prospect to sign lease
- Collect payment from prospect
- Add text here
- Add text here

Tenant operations
- Receive and deposit rent payment
- Enhance tenant engagement
- Perform maintenance activity
- Add text here

Lease end
- Receive notice from tenant to end lease
- Conduct pre moveout inspection
- Add text here
- Add text here
- Add text here

Turnover
- Develop turnover plan
- Determine turnover cost Complete turnover activities
- Add text here
- Add text here
- Add text here

This slide is 100% editable. Adapt it to your needs and capture your audience's attention.

Brainstorming:

Team discussion to explore all possible ways to prevent deletion of users assigned to lease incident templates.

Idea Listing:

Documented all potential solutions from both technical and administrative perspectives.

Grouping:

Organized ideas into categories like automation, governance, and notification for better evaluation.

Action Planning:

Selected and planned implementation of a before-delete flow to block user deletion linked to lease templates.

step3:Idea prioritization

Evaluated all proposed solutions based on feasibility, impact, and maintenance effort to select the most effective approach implementing a before-delete flow to prevent user deletion linked to lease incident templates.
